## TOP 5: CARS TO DRIVE ON THE GUMBALL 3000 RALLY

A continent-crossing time-trial tour, the Gumball 3000 is all about endurance in style

Jan Tegler  
10 June 2014

The noted and notorious Gumball 3000 Rally is the creation of British fashion designer, skateboarder and automotive enthusiast Maximillion Cooper. He began the rally in 1999 as way to connect friends from various walks of life in a kind of road-going party.

Now in its sixteenth year, the annual rally has evolved into a “pop culture event”, bringing together the well-heeled and celebrities from the worlds of music, fashion and film for 4,828 kilometres of dashing between famed cities, infamous parties and live concerts.

This year, the Gumball 3000 runs from Miami 2 Ibiza. Over seven days, 120 cars will hit the road on two continents with stops in Atlanta, New York, Edinburgh, London, Paris, Barcelona and finally Ibiza.

With Cooper’s rally philosophy in mind - “The only requirement I go by is to make them the most amazing, interesting, eclectic and eccentric group of cars you can get together” - here are the five cars we’d wheel on the Gumball 3000.

Discover the cars we'd run the Gumball 3000 with here >>
